Interactive shell (incl. active venv)
Scripts and subprocesses
CI jobs and containers
AI coding agents (no terminal)
Layer 1: shell functions pip, pip3, python, python3 (evaluated before PATH; win inside an active venv)
Layer 2: PATH shim ~/.local/bin/pip, pip3 (non-interactive callers)
pipguard (single static Go binary)
1 Parse pip arguments; read -r files; install / download / wheel only
2 Index and allowlist policy (custom --index-url: not checked)
3 Metadata: local cache (24 h) or PyPI JSON API (3 s timeout)
4 Decision: unregistered (I-01) or project < 30 days (I-02) [+ I-10 opt-in]
5 Severity: metadata points (I-04..I-09) WARNING vs DANGER
SAFE or error (fail-open): exec real pip
SAFE
PyPI JSON API (name only)
WARNING / DANGER TTY: reasons + [y/N] prompt No TTY: cancel, JSON line, exit 3
